November 17, 2012

To Whom it May Concern,

Kenneth Buzo is a student of mine at Henry Ford Community College. Kenneth is completing the second year of the Nursing Program May 2012. I taught Kenneth advanced medical/surgical nursing, a very complex course dealing with care of the acutely ill medical surgical patients. Kenneth did very well in this course. He regularly attended class, came well prepared, and actively participated in discussions. His theory grade reflected his level of commitment. He finished the course earning a grade of an "A." His clinical performance was reported as excellent. He functioned well in a busy, high acuity medical center.

Kenneth is gaining skills with management of a group of medical surgical clients. He is skilled at priority setting and use of the nursing process. He safely administers medications by multiple routes. He is aware when he needs assistance and is accepting of constructive criticism. He functions well with his peers and with the nurses on the clinical unit. I do expect him to eventually assume a leadership role in nursing as he gains experience in nursing.

I can easily recommend Kenneth for a position after an orientation appropriate for a new graduate. He currently possesses an Emergency Medical Technician license in Michigan. He is very familiar with healthcare and the hospital environment. If you have any questions, please call me at 313-845-9787.

Sincerely,

Diane Donbrosky RN MSN
