6 December 2012

To Whom It Concerns,

It has been my pleasure to have had Mr. Kenneth Buzo as a student (as he completes his nursing studies at Henry Ford Community College), in his final semester of nursing courses, pediatric and management nursing lecture and in the management clinical rotation this fall semester. He attended class and was prepared to discuss lecture content. His critical thinking skills and understanding of the variety of management topics was evident in his classroom participation, and during case scenario discussion.

Although I did not have Mr. Buzo in the pediatric inpatient clinical aspect of the nursing program, a review of his clinical portfolio (based on the comments made by his clinical nursing instructor), indicates that he has comprehended lecture content and was able to apply it in the clinical setting. It has been with the current management clinical experience that Ken has had the opportunity to enhance his critical thinking skills in effectively handling 3-4 patients, all with complex medical-surgical diagnoses and diverse nursing regimens. His assessments and care planning during this 5 week clinical were well thought out, direct patient care on target and interventions all-inclusive.

I would definitely recommend Mr. Kenneth Buzo for consideration within your service. He would be an asset to any institution's nursing division. If you have questions or need additional documentation, please call my office at: (313) 845-9736.

Sincerely,

Kathleen J. Murray, MSN, RNC, CFN, CHS III
